## Work Experience

---

### Team Lead · CTO

Moscow, Russia

*Likvi - worldwide car search aggregator providing access to millions of ads for quick car discovery.*

Dec. 2022 - Dec. 2025

- Built the product from scratch and led architecture and technical decisions from MVP to production;
- Delivered the first MVP in ~6 months starting from zero codebase, infrastructure, or processes;
- Scaled the team from 2 to 6 people (backend, frontend, mobile, QA, DevOps), with no turnover over 3 years and clear growth paths for engineers;
- Migrated infrastructure from bare metal to cloud, reduced downtime, set up CI/CD, and split a monolith into microservices to improve reliability and feature delivery.

### Senior Software Engineer · Technical Lead

Moscow, Russia

*Eapteka - large online pharmacy and e-commerce platform serving customers across Russia.*

Jan. 2022 - Oct. 2023

- Delivered the team's first production microservice during the company's early transition from a monolith;
- Took responsibility for backend design decisions within the team and ensured technical quality through reviews and discussions;
- Improved knowledge sharing and technical alignment by organizing meetups and encouraging participation in external engineering events.

### Senior Software Engineer

Moscow, Russia

*Skyeng - worldwide large online education platform focused on language learning.*

Jan. 2021 - Jan. 2022

- Took ownership of several key features in the internal HRM system, from design to production;
- Built a system for employee interactions, including notifications and internal communication tools, used by thousands of employees, improving accessibility and reducing manual support;
- Raised overall code quality and maintainability through refactoring, code reviews, and close collaboration with QA and other teams.

### Middle Software Engineer

Moscow, Russia

*Tendertech - fintech platform for issuing bank guarantees, loans, and insurance for commercial and government procurement.*

Aug. 2019 - Oct. 2020

- Contributed to the migration of the core product from Drupal to Symfony, improving maintainability and performance of critical financial services;
- Supported team development by mentoring junior engineers and sharing knowledge across the team.

## Education

---

### Saratov State Technical University

Saratov, Russia

B.Sc. in Computer Science

2015 - 2019

## Honors and Awards

---

### YouCon Hackathon

March, 2017

1st place with a geo-advertising project
