Work Experience

Team Lead · CTO

Likvi - worldwide car search aggregator providing access to millions of ads for quick car discovery.

Moscow, Russia

Feb. 2023 - Dec. 2025

- Built the product from scratch and led architecture and technical decisions from MVP to production;
- Delivered the first MVP in ~6 months starting from zero codebase, infrastructure, or processes;
- Scaled the team from 2 to 6 people (backend, frontend, mobile, QA, DevOps), with no turnover over 3 years and clear growth paths for engineers;
- Migrated infrastructure from bare metal to cloud, reduced downtime, set up CI/CD, and split a monolith into microservices to improve reliability and feature delivery.

Senior Software Engineer · Technical Lead

Eapteka - large online pharmacy and e-commerce platform serving customers across Russia.

Moscow, Russia

March 2022 - Feb. 2023

- Delivered the team's first production microservice during the company's early transition from a monolith;
- Took responsibility for backend design decisions within the team and ensured technical quality through reviews and discussions;
- Improved knowledge sharing and technical alignment by organizing meetups and encouraging participation in external engineering events.

Senior Software Engineer

Skyeng - worldwide large online education platform focused on language learning.

Moscow, Russia

Jan. 2021 - Jan. 2022

- Took ownership of several key features in the internal HRM system, from design to production;
- Built a system for employee interactions, including notifications and internal communication tools, used by thousands of employees, improving accessibility and reducing manual support;
- Raised overall code quality and maintainability through refactoring, code reviews, and close collaboration with QA and other teams.

Middle Software Engineer

Tendertech - fintech platform for issuing bank guarantees, loans, and insurance for commercial and government procurement.

Moscow, Russia

Aug. 2019 - Oct. 2020

- Contributed to the migration of the core product from Drupal to Symfony, improving maintainability and performance of critical financial services;
- Supported team development by mentoring junior engineers and sharing knowledge across the team.

Education

Saratov State Technical University

B.Sc. in Computer Science

Saratov, Russia

2015 - 2019

Honors and Awards

YouCon Hackathon

1st place with a geo-advertising project

March, 2017
